

SUNRIGHT® FACE & BODY SUNSCREEN SPF 50

Expect more from your sun products. Sunright solutions help you look and feel great as you enjoy your time in the sun. From better UV protection to a natural-looking sunless tan, trust Sunright for the right products and the right benefits for your days in the rays.

MEET SUNRIGHT SPF 50

Enjoy some fun in the sun the right way with this specially formulated non-greasy, water-resistant sunscreen. Your entire family will love the broad-spectrum SPF 50 formula that does more than protect against UVA/UVB. Featuring Astaxanthin, Physalis Angulata Extract, and hydrating ingredients, Sunright SPF 50 also protects against environmental stressors, keeps skin cooler and calmer when exposed to UV or infrared, and moisturizes and soothes skin with quenching hydration.

WHY YOU'LL LOVE IT

- Helps protect against broad-spectrum UVA/UVB.
- Features antioxidants to help protect against other environmental stressors.
- Helps keep skin cooler and calmer when exposed to sunlight and infrared rays.
- Non-greasy and water-resistant.
- Moisturizes and soothes skin.
- Formulated for both face and body.
- Safety-dermatologist tested.
- Features a tube made with 35% post-consumer resin (PCR).

WHAT POWERS IT

- **Astaxanthin (Haematococcus Pluvialis Extract)**—an antioxidant that helps protect skin against environmental stressors, including UV.
- **Physalis Angulata Extract**—helps keep skin cooler and calmer when exposed to sunlight and infrared rays.
- **Aloe Vera Juice, Bisabolol, and Panthenol**—moisturize and soothe skin.

HOW TO USE IT

DIRECTIONS: Apply evenly 15 minutes prior to sun or water exposure.

REAPPLY: After 80 minutes of swimming or perspiring, immediately after towel drying, and at least every two hours.

CHILDREN UNDER 6 MONTHS: Ask a doctor.

Enhancer Skin Conditioning Gel

LEARN MORE ABOUT IT

What makes Sunright SPF 50 different from other sunscreens on the market?

Like most sunscreen products, Sunright SPF 50 provides sun protection from both UVA and UVB rays. But what makes Sunright unique is that it also features moisturizing and skin-soothing ingredients. This includes Astaxanthin and Physalis Angulata Extract. Astaxanthin, a powerful antioxidant, helps protect skin from environmental stressors, while Physalis Angulata Extract keeps skin cooler and calmer in the presence of sunlight. It's more than just regular sunscreen.

SUNRIGHT® FACE & BODY SUNSCREEN SPF 50

Is Sunright SPF 50 water-resistant?

Sunright SPF 50 is water-resistant for 80 minutes of uninterrupted fun in the water. This is the maximum amount of time you can go before you need to reapply.

Is Sunright SPF 50 safe to use around coral?

There is very little scientific evidence to suggest that sunscreen chemicals cause coral damage. For example, the National Oceanic and Atmospheric Administration has named temperature/climate change, runoff, pollution, overexposure to sunlight, and low tides as the culprits to coral bleaching. But Sunright SPF 50 has been formulated to fully comply with all current local legislation requirements related to this issue.

When should I apply Sunright SPF 50?

We recommend that you apply Sunright SPF 50 to dry skin approximately 15 minutes before going outside. If you are going to be in the sun for longer periods of time, you'll need to reapply your sunscreen at least every two hours, or at least every 80 minutes if you're sweating or getting wet, and immediately after towel drying.

Is it really that important to reapply Sunright SPF 50?

Absolutely. Excessive perspiring, toweling off, and swimming can all affect how long a sunscreen stays on your skin and protects against harmful UV damage. It's very important that you regularly reapply this protection so that you can safely enjoy your time in the sun.

Does Sunright SPF 50 provide both UVA and UVB protection?

Yes. Sunright SPF 50 provides broad-spectrum protection against UVA and UVB rays.

What does SPF stand for?

SPF stands for Sun Protection Factor. This number is linked to how long you can be exposed to the sun while wearing the sunscreen and still be protected. But the time it takes for someone's skin to burn varies greatly with every individual, so it is important to remember that sunscreen is not a one-size-fits-all science.

What is the difference between Sunright SPF 35 and Sunright SPF 50?

The main difference between Sunright SPF 35 and Sunright SPF 50 is the type of sun protection they provide. Sunright SPF 35 is formulated with physical UV filters that block and deflect UV rays. Sunright SPF 50 is formulated with different UV filters that scatter and absorb UV rays to provide even more sun protection. The difference in the sun protection factor (SPF) is based on these different sunscreen agents.

How does Sunright support Nu Skin's commitment to become more sustainable?

Sunright Face & Body Sunscreens feature tubes made with 35% post-consumer resin (PCR). By purchasing Sunright, you're joining us in taking an active, engaged stride to ensure the future is bright for both the planet and each of us. Visit www.nuskin.com/sustainability for more information and details on how to recycle.
